

## COADE – What happened in 2008?

2008 was a remarkable year for COADE, Inc. with significant growth in all of our product lines. COADE products were featured at several international shows including the American Petroleum Show in Venezuela, Singapore Water Week, the NEFTEGAZ exhibition in Moscow, the 19th World Petroleum Conference in Madrid, the SPAR 2008 Conference on 3D Laser Scanning, Plant-Tech 2008 in The Hague, Netherlands, and SPAR–J, Japan.

Other COADE's 2008 highlights include:

**New Products and Product Updates** – In 2008, COADE released COADE CADWorx Design Review that was developed specifically to provide faster and easier review of CADWorx and plant design models by designers, project managers and other stakeholders. COADE also announced several other new software releases last year including CADWorx, CAESAR II, PVElite and CodeCalc, CADWorx FieldPipe for CloudWorx and TANK.

**COADE sets up in Japan** – In 2008, COADE established its first overseas subsidiary, COADE Japan. COADE's CAESAR II and CADWorx products are highly regarded in Japan and widely used in the plant engineering industry. By establishing COADE Japan, COADE intends to strengthen its presence with this new regional representation.

**COADE's First User Conference** – Last year, COADE hosted its first CADWorx User Conference, which was a major success with over 300 plant design and engineering professionals attending from 26 countries worldwide. A Driver of Success Competition, held as part of the conference, honored eight first-place winners with a free trip to the conference. The winners competed against others in their regions by submitting stories that highlighted real-world successes in the use of the COADE CADWorx Plant Design Suite. After taking part, many attendees committed to signing up for the 2009 COADE User Conference, which will cover all of COADE's products and is scheduled for September 2009. For more on the COADE 2009 User conference please visit: <http://www.coadeuserconference.com/2009>.

**COADE Discovery Tours attract 4,000 users** – Our global COADE Discovery Tours held in 2008 continued to attract a record number of plant engineers and designers. These Discovery Tours are designed to help existing and prospective clients learn more about COADE products and services and how to leverage them for maximum benefits. Last year COADE Discovery Tour stops included *North America*: Long Beach, CA, Seattle, WA, Portland, OR; *Western Europe*: Portugal and Spain; *South America*: Argentina, Bolivia, Brazil, Chile, Colombia, Peru, Venezuela; *Middle East*: Abu Dhabi and Doha; *Asia Pacific*: Singapore; *Australasia*: Sydney and Melbourne; *India*: New Delhi and Mumbai; *South Africa*: Johannesburg and Durban. If you would like more details or would like to request a tour stop in your city, please visit our website: [www.coade.com](http://www.coade.com)

**COADE Global Network Partners Grows** – As you may know, in 2007 COADE established the COADE Global Network Partnership, an alliance of premier global network representatives. These representatives have an average of 12 years representing COADE and COADE's products in their regions. In 2008, COADE welcomed two new COADE Global Network Partners; CORTEX, headquartered in Melbourne, Australia for the Australasia region, and Engineering Design Solutions Asia (EDSA), headquartered in Kuala Lumpur, Malaysia Bangkok, for the Southeast Asia region.
